DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a 2x2 wireless network having a SISO system, a first and second receiver, a de-mapping and signal separation module, and wherein a data transmission rate greater than 100 Mbps at a bit error rate of 10^{-4} .
 - II. Claims 7-15, drawn to a decoder for a 2x2 coded orthogonal frequency division MIMO system having a de-mapping and signal separation module, first and second de-interleaver and Viterbi decoder, and wherein the decoder enables a transmission rate that is double the transmission rate of an optimal 54 Mbps SISO system to 108 Mbps.
2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I drawn to a 2x2 wireless network comprising a SISO system having a data transmission rate greater than 100 Mbps at a bit error rate of 10^{-4} . and wherein Group II has a separate utility such a decoder for a 2x2 coded orthogonal frequency division MIMO system having the decoder that enables a transmission rate that is double the transmission rate of an optimal 54 Mbps SISO system to 108 Mbps. See MPEP § 806.05(d).

3. Because these inventions are independent and distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and different searches are required for each group. See MPEP § 808.02(d).

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). and (ii) identification of the claims encompassing the elected claims.

5. The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
